

■ **Course title:**

# Introduction to Urea Plant Operational Aspects

■ **Introduction:**

This training course will discuss the operating and control philosophy of Stamicarbon and Snamprogetti urea plants. Of each plant section the key performance control indicators, key analysis for process control, the key parameters for corrosion control and the key parameters for avoid explosion risks will be discussed in detail.

■ **Course outline:**

## Module 1: Stamicarbon Plant (duration 1.5hr)

- Operating and control philosophy Stamicarbon Plant
  - Synthesis section
    - Synthesis pressure
    - Inert content
    - Reactor conversion
  - Recirculation section
  - Evaporation section
  - Hydrolyser/Desorber section
- Key performance indicators
- Key parameters for process control
- Key parameters for corrosion control
- Key parameters for explosion control

## Module 2: Snamprogetti Plant (duration 1.5hr)

- Operating and control philosophy Snamprogetti Plant
  - Synthesis section
    - Synthesis pressure
    - Inert content
    - Reactor conversion
  - Recirculation section
    - MP absorber column

Author / Trainer:

**Mark Brouwer**

Process & Safety Engineer,  
Urea Expert

---  
Mark has over 25 years of licensing, revamping, engineering and consultancy experience in urea projects. He has been visiting more than 100 urea plants located in almost all continents.

Mark has experience in all project phases starting from Concept and Front End Engineering (FEED) through Commissioning and Operation. He is a Master of Chemical Engineering, Post Bachelor in Safety for Engineers, Marketing and Business Strategy Courses at the Rotterdam School of Management and a Member of American Institute of Chemical Engineers (AIChE).

Mark has extensive experience in revamp studies, engineering and process safety consultancy services to EPCM companies and urea plants including the preparation of Revamp and Plant Assessment and Safety Reports, hazard identification and analysis, troubleshooting, risk registers, corrosion inspections, procurement services, training services, etc.

Mark's expertise are Process technology, Corrosion, Licensing, Engineering, Revamping, Marketing, Sales, Contract negotiations, Troubleshooting, Project Management, International business, Safety, high pressure urea valves, high pressure urea equipment.

Mark has provided extensive training programs to more than 1000 urea engineers, managers, (shift)supervisors and operators from all over world.

Mark has published numerous technical papers in reputable industry magazines and presented at numerous CRU Nitrogen & Syngas and AIChE Ammonia Safety Conferences.

Evaporation section

Hydrolyser/Desorber section

- Key performance indicators
- Key parameters for process control
- Key parameters for corrosion control
- Key parameters for explosion control

### ■ Learning Outcomes:

By the end of this course, you will understand:

- The operating and control philosophies of Stamicarbon and Snamprogetti urea plants
- Key performance indicators
- Key parameters for process control
- Key parameters for corrosion control
- Key parameters for explosion control

### ■ Who will benefit:

Anyone who is involved in the design, engineering, operation and maintenance of Stamicarbon and Snamprogetti urea plants, including marketing, sales, business development urea production technologies or production equipment and instrumentation including:

- Engineers and Managers
- Operations
- Maintenance
- Marketing and Business Development Managers

### ■ Course materials:

- Hand Out Presentations in pdf format
- Technical Paper: Comparison Stamicarbon - Saipem – Process Technologies

### ■ Price:

**€ 400**

■ **Discounts:**

- 2 places – 10% discount
- 3 places – 15% discount
- 4 or more places – 20% discount.

■ **In-company training:**

This course is also available as an in-company course (face-to-face or online) where content can be customised to meet your organisation's specific needs and delivered on a date/location that suits your requirements.

[Contact us](#) for more information.
